## About Morning Star Oils

For over a decade, Morning Star Oils has endeavored to put the healing power of essential oils into people's hands and encourage the body's ability to heal itself. It is our goal to help you gain optimal vitality and support vibrant health.

Our products are made from all-natural, organic, and wild-crafted ingredients, in small batches, to ensure quality and potency. We use therapeutic grade oils, selected through extensive research and comparison, to bring you quality and affordability. Our mission is to make aromatherapy more accessible for you. Our blends can be custom tailored to fit a preference or create a whole new formula.

Morning Star Oils initially began as a "cottage industry" based on the demand for artisan-crafted aromatherapy formulas. We have a resident Aromatherapist on staff to evaluate our formulas and ensure quality as well as safety, so we can bring you the best possible product.

### SANI-T

Our most versatile formula! A sanitizer made from natural ingredients that kills germs and bacteria, is *beneficial* to the skin and respiratory system, and has NO alcohol! Imagine cleaning your hands and boosting your immune system at the same time! Original or Lemongrass both available in three forms so you can decide what works best for you.

-Spray - for hands, surfaces, or air 2oz \$4 4oz \$6 8oz \$8

-Gel - for topical use 2oz \$4 4oz \$7 8oz \$12

-Concentrate – for diffusing or "green cleaning" with castile soap .5oz \$10

*Custom blends add \$5.*

## Why Essential Oils?

Essential oils are amazing! While they are still relatively new to the U.S., they are used in medical practices all over the globe and have been for hundreds of years. There is an enormous amount of chemistry, anatomy, and physiology involved. There is also a great deal of safety considerations that involves everything from age to Varicella-Zoster (a.k.a. "Chicken Pox"). Essential oils have been proven to be effective in treating issues such as: acne, allergies, arthritis, anxiety, bad breath, body odor, brain fog, cold/flu, depression, earache/infection, fatigue, flatulence, dandruff, hypertension, hormone imbalance, infection, inflammation, insomnia, joint/muscle pain, low immune function, menstrual cycle,

oily hair or skin, poor digestion, poor circulation, reflux, scars, skin irritation, stress, toothache, vertigo, and water retention - to name a 'few'.

Essential oils are not only very effective; they can also be very expensive. Although a vast amount of information is available on essential oils, is it likely that you know exactly which plant, species, distiller, carrier, application, and dilution you need? Even then, an easy estimate could be \$75 per formula. This is where MSO can help. We do the work for you for as little as \$5 for an inhaler or \$25 for a "neat" blend.

It is well-known what essential oils can do. You can feel great *and* smell great! There is no question that aromatherapy is a fantastic way to...

*"Treat Yourself!"*
